

CASE STUDY

SpiraPlan Drives 30% Increase in Project Delivery Efficiency for ORIX-METRO

The Company

Company: ORIX-METRO

Industry: Finance and Leasing

Location: Philippines

The Challenge

ORIX-METRO faced persistent challenges related to integration and troubleshooting within their application lifecycle management (ALM) and test automation processes. These issues were critical roadblocks, impeding the efficient management and deployment of financial software systems.

Tools Used Prior

D365 was used prior to Inflectra

Inflectra Tools Used

- SpiraPlan
- SpiraTeam
- SpiraApps

The Objective

- Improve Operational Efficiency: Streamline processes to enhance productivity and reduce delays.
- Create an Integrated System: Ensure all software tools used in the company communicate smoothly.
- Simplify Troubleshooting: Reduce system downtime by making problem-solving faster and more effective.

SpiraPlan Drives 30% Increase in Project Delivery Efficiency for ORIX-METRO

Why Spira by Inflectra?

ORIX-METRO had a history of success with Inflectra products, having used them on prior projects to great effect. This familiarity and trust played a crucial role in their decision to continue their partnership.

Key Reasons for Choosing the Inflectra Products:

- Feature completeness and unlimited usage
- Deployment options: Cloud and on-premises
- Industry functionality: Compliance, traceability, auditability
- Operational functionality: Scaled Agile, project management, requirements management, advanced QA.

“

Spira' had a substantial impact on our operations. The platform's comprehensive compliance features **streamlined our audit preparation**, saving valuable time and resources. **Issues in production were minimized by 10%**, contributing to a more stable and reliable operating environment.
