

## Development Roadmap

March 2017

Rapise is the highly acclaimed test automation system from Inflectra that can be used to test desktop, web and mobile applications. This roadmap document outlines the functionality currently planned for the next releases of the system. However we are responsive to customer feedback, and the exact composition of each release may vary from this roadmap as a result. If you have any feedback or suggestions regarding this release schedule, please send us an email at [support@inflectra.com](mailto:support@inflectra.com) with comments.

### Version 5.1 - Spring 2017

- Specialized support for testing Office365 web applications
- Specialized support for testing Dynamics365 web applications
- General usability updates to streamline record/playback
- Integration with Kobiton mobile device cloud
- Enhances REST API testing validation functionality
- Sample frameworks using Rapise with Git or Microsoft TFS
- Global File Object to streamline file handling
- Rapise visual language, scriptless recording format support
- Support for Apple Xcode XCUITest and Appium 1.6 (replaces UIAutomation)

### Version 5.2 - Fall 2017

- Support for recording with Microsoft Edge Web on Windows 10
- Support for recording test scripts during mobile testing when sending events
- Additional specialized support for testing Office365 web applications
- Additional specialized support for testing Dynamics365 web applications

### Version 5.3 - Winter 2017

- Data-driven testing, integrated with planned Spira data-tables
- Support for additional packaged applications based on customer feedback
- Smart-Learn functionality for learning complex compound objects
