Legal Notices	13

Introduction

Rapise™ is a next generation software test automation tool that leverages the power of open architecture to improve application quality and reduce time to market.

This installation guide outlines how to setup a working installation of Rapise including the installation of any dependencies and prerequisites. It also provides information on obtaining an evaluation or production license key from Inflectra so that you can use the software.

It assumes a basic understanding of how to setup and administer a Windows XP®, Windows Vista® or Windows7® workstation, and also assumes that you have access to a valid Administrator level account that can install software.

For information on how to use the features of Rapise please refer to either the *Rapise Quick Start Guide* or the *Rapise User Guide* instead.

1. Installing Rapise

This section outlines how to prepare your system for installation of Rapise, and how to actually install the software using the provided installation package.

The first sub-section will outline what hardware and software configurations are supported and the exact installation sequence for Windows XP, Windows Vista or Windows 7. The second sub-section will explain how to load the Rapise software onto the computer, and discuss common problems and solutions.

The minimum hardware and software requirements for running the Rapise are:

Requirement	Minimum Specification
Processor:	Intel® or AMD® x86 or x64 compatible processor
Memory:	1 GB, 2 GB recommended
Disk Space:	500 MB
Display:	XGA (1024 x 768)
Operating System:	Microsoft Windows XP 32-bit Microsoft Windows XP 64-bit Microsoft Windows Vista 32-bit Microsoft Windows Vista 64-bit Microsoft Windows 7 32-bit Microsoft Windows 7 64-bit Microsoft Windows Server 2003 32-bit Microsoft Windows Server 2003 64-bit Microsoft Windows Server 2008 32-bit Microsoft Windows Server 2008 64-bit
Service Packs:	Windows Server 2008 SP1 Windows Server 2003 SP2 Windows Vista SP1 Windows XP Professional SP3
Web Browser:	Internet Explorer 6.0+ Mozilla Firefox 3.0+ Google Chrome 5.0+
Other Components:	.NET Framework 3.5 SP1 Microsoft Excel 2003+ (optional)

1.1. System Prerequisites

Assuming that you have already installed the appropriate version of Microsoft Windows onto your computer (or that has been pre-installed for you), you need to then make sure that the various prerequisites have been correctly added to your installation before trying to install Rapise. The Rapise installer will check to ensure that the various prerequisites are in place, and will abort the installation if any are missing, indicating to you what action needs to be taken.

1.1.1. Microsoft .NET 3.5 SP1

On Windows Vista, Windows 7 and Windows 2008 Server installations, Microsoft .NET Framework v3.5 SP1 is usually installed as part of the factory configuration, whereas on earlier operating systems, you might need to manually add the .NET 3.5 SP1 components to the factory configuration.

To see which version of the Microsoft .NET framework installed, open up Windows Explorer® and navigate to C:\WINDOWS\Microsoft.NET\Framework and then the subfolders listed will indicate which version(s) of the framework you have installed:

To install the .NET Framework, launch Internet Explorer and enter the URL: <http://www.microsoft.com/netframework>. From this page there will be links to download and install the appropriate version of the .NET Framework (version 3.5 SP1 at time of writing). Click on the option to download and install the .NET Framework, and follow the instructions provided. Once you have completed the install, verify that the installation was successful by looking in the “Administrative Tools” folder as illustrated above. You also need to make sure that .NET 3.5 SP1 has been installed if necessary.

1.1.2. Microsoft Visual C++ 2005 SP1

The installer package for this component will be listed in the “My Downloads” section of the Customer Area of the Inflectra website. This is the same place where you would have downloaded the main Rapise installer package. Please download this prerequisite from our website and double-click on it to install the Microsoft Visual C++ 2005 SP1 package.

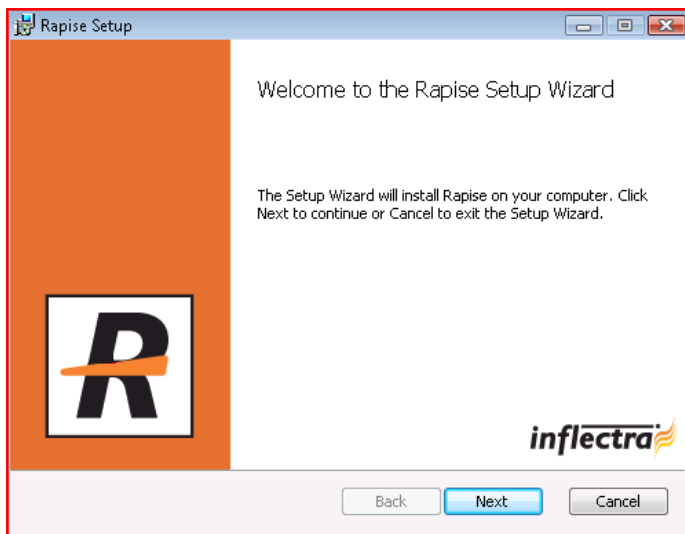

1.1.3. Microsoft Primary Interoperability Assemblies 2005

The installer package for this component will be listed in the “My Downloads” section of the Customer Area of the Inflectra website. This is the same place where you would have downloaded the main Rapise installer package. Please download this prerequisite from our website and double-click on it to install the Microsoft Primary Interoperability Assemblies 2005 package.

1.2. Installing the Software

Now that all the prerequisites have been correctly installed, you are now ready to install Rapise onto your system. To perform the installation, you will need the installation package downloaded from the Inflectra® website.

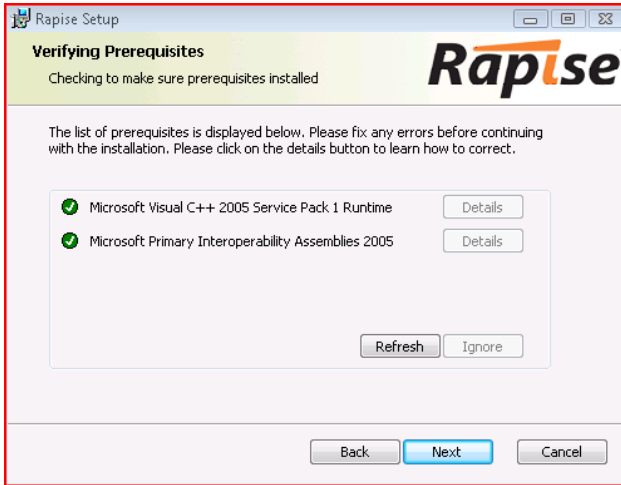

To start the installation, double-click on the Rapise installation package (it will have a filename of the form RapiseInstaller-vX.Y.msi), and the Windows Installer will display the following dialog box:

Click the <Next> button to start the installation wizard. The next page of the installation wizard will display a list of all the required pre-requisites and whether the installer could find them or not:

If any of the prerequisites were not correctly installed, the installer will display a red cross icon next to the missing component(s). If this happens, please click on the [Details] button and the appropriate component will be downloaded from our website. You will be asked if you want to install the item. Click the button to install the component. Once all the prerequisites have been installed, click on Refresh the restart the installer again:

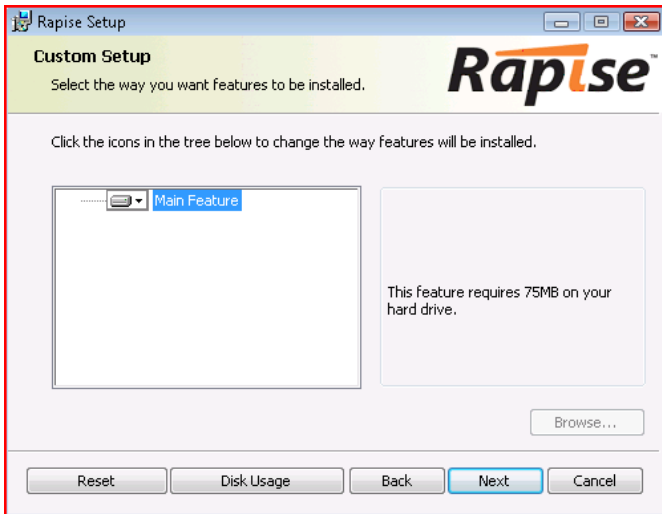

If for any reason you have the prerequisite installed but the installer was not able to find it (this can occasionally happen on certain environments), click the <Ignore> button to proceed with the installation.

Once the prerequisites have been correctly installed, clicking <Next> will bring you to the next page in the installation wizard:

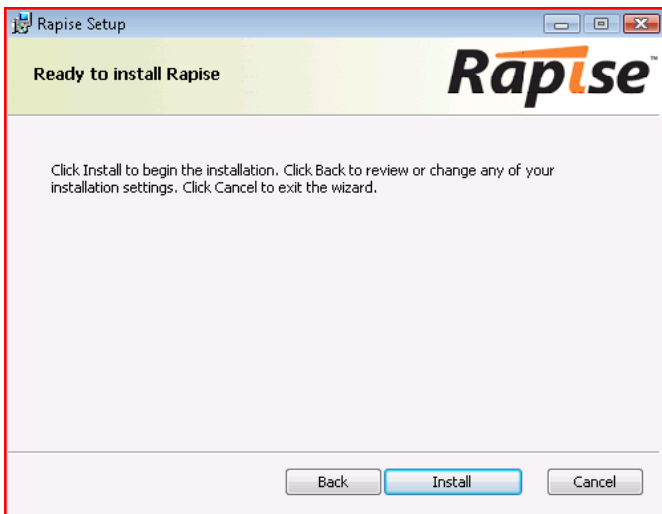

The next screen in the installation wizard outlines the Inflectra End User License Agreement (EULA). Please read this carefully as it describes the legal contract between you – the user of the software – and Inflectra® Corporation, the developer and publisher. Once you have read the agreement and understood your rights and obligations, select the checkbox marked “I accept the terms in the License Agreement” and click the <Next> button.

The following screen will be displayed:

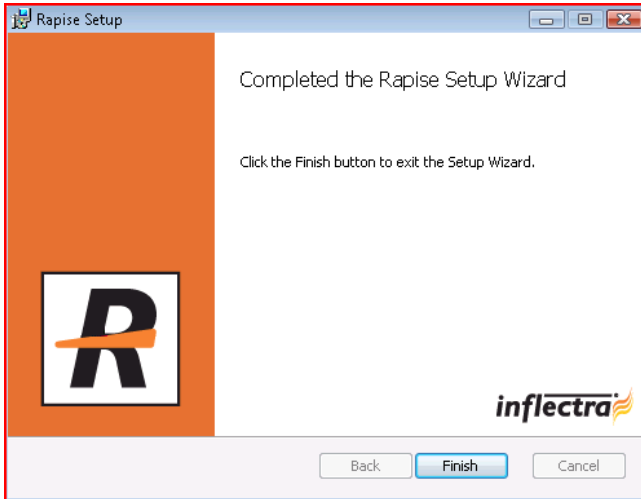

Click the <Next> button to go to the next page in the installation wizard:

Click the <Install> button to actually begin the process of installing Rapise onto your system. If you are installing Rapise onto Windows Vista or Windows7, then you may be prompted by the Windows User Access Control (UAC) security system to confirm that you want to install a new piece of software. Click the option that confirms you want to proceed with the install.

The installer will then display a progress bar that gradually fills as the installation proceeds. Once the installation is complete, the following message will be displayed:

Congratulations! You have successfully installed Rapise onto your system.

You should now have a Rapise shortcut icon added to your Windows Desktop and if you click on Start > Program Files > Inflectra > Rapise, you should see the new Rapise program group:

2. Activating Rapise

Once you have successfully installed Rapise, you will need to activate it with a license key (either a temporary evaluation key or a permanent production key). This section describes the process for activating your copy of Rapise as well as how to perform updates to the license key and potentially move it to another computer.

2.1. Getting Your Activation Code

When you first launch Rapise after installation, it will display the following dialog box:

You should now enter the alphanumeric activation code from the Customer Area of the Inflectra website (the same page that you downloaded the installation package from). It will be displayed in the “My Licenses” section of the webpage. An example page is shown below:

My Licenses			
This is where you can retrieve the license keys for any software you have purchased, together with those for any product updates:			
Fixed-User Licenses			
Product	Activation Code	License Key	Expiration
Rapise	DMO1109231151403958	(Activate)	
Rapise	DMO1109301651558523	(Activate)	
Rapise	SDM1109231246484092	(Activate)	

There are two kinds of activation code:

- Evaluation Activation Codes – these start with the letters “DMO”
- Production Activation Codes – these start with the letters “SDM”

You should enter the appropriate activation code into the Rapise activation wizard and choose the option to either activate online or offline. If you are connected to the Internet, online activation is easier. If you are not connected to the Internet (e.g. working in a secure environment), then you will need to use the offline activation option.

The following sections will explain how each of the options work:

2.2. Activating Online

To use online activation, make sure you are connected to the Internet, enter the activation code, choose “Activate Online” and click the <Next> button:

Inflectra Activation Manager

Product Activation **Rapise**

Enter Activation Code:
DMO1110031641337532

Activate Online
 Offline Activation

Please, enter activation code.
You need an Internet connection to Activate Online instantly. If you are not connected to Internet choose Offline Activation.

< Back Finish Cancel

The activation system will contact our activation server, process the activation code and activate the license. The application will start automatically and if you visit the Customer Area of our website, you will see that it is listed as activated, with a license key displayed:

My Licenses

This is where you can retrieve the license keys for any software you have purchased, together with those for any product updates:

Fixed-User Licenses

Product	Activation Code	License Key	Expiration
Rapise	DMO1110031641337532	[REDACTED]	11/28/2011

2.3. Activating Offline

To use offline activation, enter the activation code, choose “Activate Offline” and click the <Next> button:

Inflectra Activation Manager

Product Activation **Rapise**

Enter Activation Code:
DMO1110031641337532

Activate Online
 Offline Activation

Please, enter activation code.
You need an Internet connection to Activate Online instantly. If you are not connected to Internet choose Offline Activation.

< Back Next > Cancel

This will bring up the Offline Activation screen:

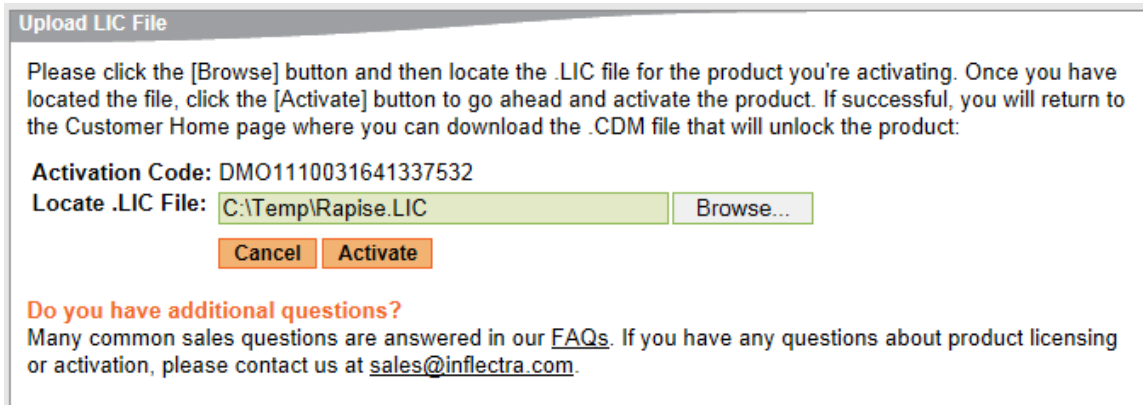

Click on the [Save] button to save the Rapise.LIC file to your hard drive.

Copy across the Rapise.LIC file to a computer that has Internet access and open up the Customer Area of our website:

Click on the **Activate** link which will take you to the Offline Activation part of our website:

Click on the [Browse] button and navigate to the place where the Rapise.LIC file is stored. Then click on the [Activate] button to begin the activation process. Assuming that the License file is valid, the website will activate the license and take you back to the Customer Area where the license key will be displayed:

My Licenses

This is where you can retrieve the license keys for any software you have purchased, together with those for any product updates:

Fixed-User Licenses

Product	Activation Code	License Key	Expiration
Rapise	DMO1110031641337532	[REDACTED]	11/28/2011

Click on the License Key hyperlink and you will be prompted to save the Rapise.CDM file to your hard drive. Save this file and then copy it across to the computer that has Rapise installed. Now on the Offline Activation screen:

Click the Step 3 [Open] button and browse to the Rapise.CDM file. Once you have the file selected, click on the [Finish] button to complete the activation. Assuming that the Rapise.CDM file is valid, the application will start.

If you have any problems activating your installation, please go to <https://www.inflectra.com/Support> and contact Inflectra customer support and they will help you resolve your problem.

2.4. Upgrading from Demo License

If you have installed a demonstration license, when the expiration date is reached the software will stop working and prompt to you purchase a commercial license. To purchase the commercial license, go to <http://www.inflectra.com/Rapise> and click on the appropriate Purchase link to obtain a commercial production license.

Once you have purchased the license your Customer Area will display a new activation code. Simply start up Rapise, enter the new activation code and follow the process described in section 2.2 or 2.3.

If you want to upgrade your license **before** the demonstration license is expired, you need to click on the **Activation** button in the Help section of the Rapise Test ribbon:

This will bring up the Activation dialog box:

Click on the [Enter Activation Code] button and then follow the steps in 2.3 or 2.4 to activate the product with the new production license.

2.5. Transferring to Another Computer

Sometimes you need to transfer your Rapise license from one computer to another, or the computer it's installed on needs to be rebuilt. In either case, it's important that you first deactivate the product from the current computer, otherwise you will be prevented from activating the product on the new / rebuilt computer.

To deactivate your current installation, you need to click on the **Activation** button in the Help section of the Rapise Test ribbon:

This will bring up the Activation dialog box:

Click on the [Deactivate] button and activation system will contact our activation server, process the deactivation code and deactivate the license. If you visit the Customer Area of our website, you will see that it is listed as deactivated, with the option to activate it now available:

My Licenses			
This is where you can retrieve the license keys for any software you have purchased, together with those for any product updates:			
Fixed-User Licenses			
Product	Activation Code	License Key	Expiration
Rapise	DMO1109231151403958	(Activate)	
Rapise	DMO1109301651558523	(Activate)	
Rapise	SDM1109231246484092	(Activate)	

If you have any problems deactivating your installation, please go to <https://www.inflectra.com/Support> and contact Inflectra customer support and they will help you resolve your problem.
